It is usually said that the Culture is the nature of man, Kultur ist Natur des Menschen, but we must accept, volens nolens, that the Book is the essence of human culture, Das Buch ist die wessentlich der Kultur des Menschen! Upon this assumption, we must accept that the neuron is the basic anatomical structure of the entire nervous system of all innervated living systems of the biology, culminating in human through its neo-cortex system, as the highly abstract development of an abstract representation, existing in singularity, at least up to date, within the knowing Universe! Our endeavour is trying in a reconnection between neuron of biology with the neo – cortex of human ontology, in a synthesis that is done upon a triad of philosophical schools, like those of rationalist philosophy, of empiricist philosophy and of idealist philosophy! Nonetheless, for this extremely complex philosophy endeavour, will be used ideas and concepts belonging to the materialist and idealist of Greek philosophy, to those of Oriental philosophy of Hinduism, Buddhism and Jainism of India and Taoism, Confucianism and Ch'an –ism of China. Moreover, will be some references to the ideas and concepts from different religions of human being, namely those of Egyptian religions, Mesopotamian religions, then those of Judaism, Christianity and Islam religions, then to those belonging to the Persian religion of Zoroastrianism, of Manicheism and of Shintoism. Cortexologis

repertoire of notes, diagrams, and references this book serves as a useful reference for students of medicine, and other practitioners in their respective fields.

One of the big advantages of Hellenic Language is that every Word or Expression can be used as substantive when the Definite Article "TO" be placed before of it... In this way, the consistence of the Greek Grammatik and Greek Morphology has a particular substance in creating a language of philosophy, a language of law and jurisdiction, which was the basic of the Greek political, cultural, and spiritual advancements...

Greece has had one of the greatest and prolonged influenced in Human Evolution, and even today our particularly European thought and ideas are indebted to the ancient past of Greece! In this way, the Greek Culture has been embracing by about two third of all Mankind, being endowed as the deepest, the basic unit of European culture, as Universal Culture Pattern... In some-way, the same sense as an Atom is regarded as the basic Unit of Matter, the Cell is regarded as the basic Unit of Life, or the Word is the basic unit of Human Articulated Speech, all creating for Humans the powerful of its abstractness... Greek Ontologist

...Has our Species Sapiens a guardian angel around her? Eine Schutzengel herum? ...Or just a little devil? Oder nur ein kleiner Teufel... ...Could survive our Species in this extra-stressing condition, which in the third decade of the March 2020, seems to be unbearable, seems to be chance-lost, seems to become frightened, seems to become paralyzing for the whole economy, particularly for Western Europe (Italy and Spain) and

wholeness Sapiens... Prophetologist

This book describes how the quality of life can be improved by exploiting the central role of the hearing organs from the astonishing discoveries of Professor Alfred Tomatis. This book can be considered as a standard work to establish the proper execution of the original Tomatis method. It pays tribute to Professor Alfred Tomatis' pioneering work. It provides an insight into why and for what disabilities the method works so well. A wealth of scientific validations and cases are presented to illustrate this as an aid for practitioners as well as for potential clients and to convince the outside world. Details encompass anatomy, neurology, and physiology, pathology, psychology along with interpretations of listening tests, programming and equipment. It serves both therapists and clients, as well as generally interested persons and medical or educational institutions.

First published in 1992: This book provides a comprehensive look at the design and production of microcapsules, microspheres, and nanoparticles. It discusses the diverse aspects and skills that must be mastered to prepare and test products that will work correctly and be clinically acceptable for human or animal use.

First multi-year cumulation covers six years: 1965-70.

This book is a collection of contributions written by philosophers and scientists active in different fields, such as mathematics, logics, social sciences, computer sciences and linguistics. They comment on and discuss various parts of and subjects and

propositions introduced in the Handbook of Analytical Philosophy of Medicine from Kadem Sadegh-Zadeh, published by Springer in 2012. This volume reports on the fruitful exchange and debate that arose in the fuzzy community upon the publication of the Handbook. This was not only very much appreciated by the community but also seen as a critical starting point for beginning a new discussion. The results of this discussion, which involved many different perspectives from science and the humanities and was warmly encouraged by Kadem Sadegh-Zadeh himself, are accurately reported in this volume, which is intended to be a critical companion to Kadem Sadegh-Zadeh's handbook. Rudolf Seising is currently an adjunct researcher at the European Centre for Soft Computing in Mieres, Asturias (Spain) and a college lecturer at the Faculty of History and Arts, at the Ludwig Maximilians University of Munich (Germany). Marco Elio Tabacchi is currently the Scientific Director of the Italian National Research & Survey Organization Demopolis, and a research assistant in the Soft Computing Group at University of Palermo (Italy).

How could be changed out of classical concept of ANATOMY (ana-tomos = to cut off in small pieces) which is one of the strongest imprinted scientific concept within the minds of all biologic scientists still by centuries, with the philosophical concept as ANATOMOLOGY? i.e. the Science of Anatomy, the Philosophical Science of the Anatomy, which in turn, could be synthesized by anatomists and philosophers alike!... Our endeavor is to find out a road between the two basic forms of human knowledge,

A comprehensive review and analysis of environmental literacy within the context of environmental science and sustainable development. Approaching the topic from multiple perspectives, the book explores the development of human understanding of the environment and human-environment interactions in the fields of biology, psychology, sociology, economics and industrial ecology.

Present Your Research to the World! The World Congress 2009 on Medical Physics and Biomedical Engineering – the triennial scientific meeting of the IUPESM - is the world's leading forum for presenting the results of current scientific work in health-related physics and technologies to an international audience. With more than 2,800 presentations it will be the biggest conference in the fields of Medical Physics and Biomedical Engineering in 2009! Medical physics, biomedical engineering and bioengineering have been driving forces of innovation and progress in medicine and healthcare over the past two decades. As new key technologies arise with significant potential to open new options in diagnostics and therapeutics, it is a multidisciplinary task to evaluate their benefit for medicine and healthcare with respect to the quality of performance and therapeutic output. Covering key aspects such as information and communication technologies, micro- and nanosystems, optics and biotechnology, the congress will serve as an inter- and multidisciplinary platform that brings together people from basic research, R&D, industry and medical application to discuss these issues. As a major event for science, medicine and technology the congress provides a comprehensive overview and in-depth, first-hand information on new developments, advanced

must be the duty - triad in every school, in every college or university of all those who are trying the ontological jump in our Species, still called Sapiens... Encylopaedist Anatomie, Physiologie, Pathophysiologie des Menschen Anatomie, Physiologie, Pathophysiologie des Menschen 140 Tabellen

This volume of the series Handbook of Zoology deals with the anatomy of the gastrointestinal digestive tract – stomach, small intestine, caecum and colon – in all eutherian orders and suborders. It presents compilations of anatomical studies, as well as an extensive list of references, which makes widely dispersed literature accessible. Introductory sections to orders and suborders give notice to biology, taxonomy, biogeography and food of the respective taxon. It is a characteristic of this book that different sections of the post-oesophageal tract are discussed separately from each other. Informations on form and function of organs of digestion in eutherians are discussed under comparative-anatomical aspects. The variability and diversity of anatomical structures represents the basis of functional differentiations.
