“Remarkable personal journals . . . revealing the combat experience of the German-Russian War as seldom seen before . . . a harrowing yet poignant story” (Military Times). Hans Roth was a member of the anti-tank panzerjager battalion, 299th Infantry Division, attached to the Sixth Army, as the invasion of Russia began. As events transpired, he recorded the tension as the Germans deployed on the Soviet frontier in June 1941. Then, a firestorm broke loose as the Wehrmacht tore across the front, forging into the primitive vastness of the East. During the Kiev encirclement, Roth’s unit was under constant attack as the Soviets desperately tried to break through the German ring. At one point, after the enemy had finally been beaten, a friend serving with the SS led him to a site—possibly Babi Yar—where he witnessed civilians being massacred. After suffering through a brutal winter against apparently endless Russian reserves, his division went on the offensive again when the Germans drove toward Stalingrad. In these journals, attacks and counterattacks are described in you-are-there detail. Roth wrote privately, as if to keep himself sane, knowing his honest accounts of the horrors in the East could never pass Wehrmacht censors. When the Soviet counteroffensive of winter 1942 begins, his unit is stationed alongside the Italian 8th Army, and his observations of its collapse, as opposed to the reaction of the German troops sent to stiffen its front, are of special fascination. Roth’s three journals were discovered many years after his disappearance, tucked away in the home of his brother. After his brother’s death, his family discovered them and sent them to Rosel, Roth’s wife. In time, Rosel handed down the journals to Erika, Roth’s only daughter, who had emigrated to America. Roth was likely working on a fourth journal before he was reported missing in action in July 1944. Although his ultimate fate remains unknown, what he did leave behind, now finally revealed, is an incredible firsthand account of the horrific war the Germans waged in Russia.

- Fascinating Land Rover love stories from around the globe - Includes magnificent new photos - Portraits of passionate owners - faithful Landy owners discuss their adventures - Celebrates the many uses of the Land Rover, from a wine-growing estate in South Africa, to the urban jungle in Germany, as well as Land Rovers used by the emergency services, as mobile cafes, and as a means to cross the Alps On 29th January 2016 the last Land Rover Defender left the factory halls in Solihull (UK) - a Defender 90 Soft Top with heritage outfit - and went directly to the Jaguar Land Rover Collection exhibition. With this, a great story of success ended: the most original of all Land Rover models had been in mass production for 68 years. In 1948 it was developed for agricultural use, but the robustness of the all-wheel drive vehicle got round quickly. The demand never decreased and there were always new versions and engines. Today, 75 percent of all 'Landies' ever built

are still in use worldwide. This declaration of love for the British classic presents portraits of all Land Rover generations and of their most passionate owners.

This sumptuously illustrated volume analyzes artists' representations of angels and demons and heaven and hell from the Judeo-Christian tradition and describes how these artistic portrayals evolved over time. As with other books in the Guide to Imagery series, the goal of this volume is to help contemporary art enthusiasts decode the symbolic meanings in the great masterworks of Western Art. The first chapter traces the development of images of the Creation and the Afterworld from descriptions of them in the Scriptures through their evolution in later literary and philosophical works. The following two chapters examine artists' depictions of the two paths that humans may take, the path of evil or the path of salvation, and the punishments or rewards found on each. A chapter on the Judgment Day and the end of the world explores portrayals of the mysterious worlds between life and death and in the afterlife. Finally, the author looks at images of angelic and demonic beings themselves and how they came to be portrayed with the physical attributes--wings, halos, horns, and cloven hooves--with which we are now so familiar. Thoroughly researched by and expert in the field of iconography, *Angels and Demons in Art* will delight readers with an interest in art or religious symbolism.

Roman Britain, 366 AD: Minna, a Roman serving girl, loses her beloved grandmother. Desperate to reach her soldier brother, she falls in with Cian, an aloof but charming acrobat. A terrible mistake thrusts the pair into slavery in the wilds of barbarian Scotland, where the Romans wage war with the Picts. Now Cian and Minna must fight for their survival. And despite her loyalties to her Roman origins, Minna struggles against an irresistible call of her blood that binds her inevitably to the people who have enslaved her.

This book describes a process framework for business information management: the Business Information Services Library (BiSL®) – a public domain standard that is consistent with the IT Infrastructure Library (ITIL) and Application Services Library (ASL). BiSL establishes a bridge between IT and business processes, and between business information administrators and information managers. The BiSL process model provides an insight into all of the primary processes within their field of operations and into the relationship between the various processes. It offers a starting point for the improvement of these processes using best practices, amongst other things, and it provides uniform terminology. This book explains BiSL, a process framework for business information management, encompassing the best way to manage and execute business information management in day-to-day practice, and explains how the framework BiSL can help to improve business processes and the alignment of business and IT. Higher demands placed on the security, flexibility and convenience of electrical installations combined with the need to minimize energy requirements have led to the development of home and building management systems. The KNX technology is the result of the pooling of knowledge and experience gained over the last 25 years with the predecessor technologies to KNX, i.e. the European Installation Bus (EIB), the European Home System (EHS) and BatiBUS. The skilful application of KNX requires sound knowledge of all persons involved. Training measures are therefore required towards: \* Selection of bus devices and installation

material;\* fields of application and main applications of the KNX bus system;\* selection of the bus topology in view of the construction of the building and the desired functionalities;\* planning of the to be installed bus system;\* Installation, thereby taking into account the relevant regulations (e.g. lightning protection, electromagnetic compatibility, etc.);\* Commissioning and servicing of KNX installations. The January 2015 edition of the KNX Basic Course Documentation gives you an in-depth overview of all the above listed points. In-depth information about Security, HVAC control with KNX... can be found in the document "KNX Advanced Course Documentation" which is published separately. This Basic Course Documentation (with successful concluding exam) is the basis for KNX Partnership. Courses are organised by more than 300 certified training centres around the world.

We revisit Lipset's law, which posits a positive and significant relationship between income and democracy. Using dynamic and heterogeneous panel data estimation techniques, we find a significant and negative relationship between income and democracy: higher/lower incomes per capita hinder/trigger democratization. Decomposing overall income per capita into its resource and non-resource components, we find that the coefficient on the latter is positive and significant while that on the former is significant but negative, indicating that the role of resource income is central to the result.

Inorganic Chemistry easily surpasses its competitors in sheer volume and depth of information. Readers are presented with summaries that ease exam preparation, an extensive index, numerous references for further study, six invaluable appendixes, and over 150 tables that provide important data on elements at a quick glance. Now in its 101st printing, Inorganic Chemistry provides an authoritative and comprehensive reference for graduate students, as well as chemists and scientists in fields related to chemistry such as physics, biology, geology, pharmacy, and medicine. Translated for the first time into English, Holleman and Wiberg's book is a bestseller in Germany, where every chemist knows and values it. Prior to this translation, there was no equivalent to Holleman and Wiberg's book in English.

This book explores how lighting systems based on LED sources have the ability to positively influence the human circadian system, with

benefits for health and well-being. The opening chapters examine the functioning of the human circadian system, its response to artificial lighting, potential health impacts of different types of light exposure, and current researches in circadian photometry. A first case study analyzes the natural lighting available in an urban interior, concluding that it is unable to activate the human circadian system over the entire year. Important original research is then described in which systems suitable for artificial circadian lighting in residential interiors and offices were developed after testing of new design paradigms based on LED sources. Readers will also find a detailed analysis of the LED products available or under development globally that may contribute to optimal artificial circadian lighting, as well as the environmental sensors, control interfaces, and monitoring systems suitable for integration with new LED lighting systems. Finally, guidelines for circadian lighting design are proposed, with identification of key requirements.

Discusses the connections between food and history, natural law, the emotions, the environment, the energy crisis, international order, and world peace

This book is about modern algebraic geometry. The title *A Royal Road to Algebraic Geometry* is inspired by the famous anecdote about the king asking Euclid if there really existed no simpler way for learning geometry, than to read all of his work *Elements*. Euclid is said to have answered: "There is no royal road to geometry!" The book starts by explaining this enigmatic answer, the aim of the book being to argue that indeed, in some sense there is a royal road to algebraic geometry. From a point of departure in algebraic curves, the exposition moves on to the present shape of the field, culminating with Alexander Grothendieck's theory of schemes. Contemporary homological tools are explained. The reader will follow a directed path leading up to the main elements of modern algebraic geometry. When the road is completed, the reader is empowered to start navigating in this immense field, and to open up the door to a wonderful field of research. The greatest scientific experience of a lifetime!

Bob Dylan, Willie Nelson, Emmylou Harris, U2, Peter Gabriel, and the Neville Brothers all have something in common: some of their best albums were produced by Daniel Lanois. A French-speaking kid from Canada, Lanois was driven by his innate curiosity and intense love of music to transcend his small-town origins and become one of the world's most prolific and successful record producers, as well as a brilliant musician in his own right. Lanois takes us through his childhood, from being one of four kids raised by a single mother on a hairdresser's salary, to his discovery by Brian Eno, to his work on albums such as U2's *The Joshua Tree*, Bob Dylan's *Time Out of Mind*, and Emmylou Harris's *Wrecking Ball*. Revealing for the first time ever his unique recording secrets and innovations, Lanois delves into the ongoing evolution of technology, discussing his earliest sonic experiments with reel-to-reel decks, the birth of the microchip, the death of discrete circuitry, and the arrival of the download era. Part technological treatise, part philosophical manifesto on the nature of artistic excellence and the overwhelming need for music, *Soul Mining* brings the reader viscerally inside the recording studio, where the surrounding forces have always been just as important as the resulting albums. Beyond skill, beyond record budgets, beyond image and ego, Lanois's work and music show the value of dedication and soul. His lifelong quest to find the perfect mixture of tradition and innovation is inimitable and unforgettable. Crammed with comic capers to try out on unsuspecting victims, and side-splitters to share, this ring-binder is a mix of practical pranks and wisecracks. Readers can depress the laughter button on the front for a tide of titters to accompany their tale telling. Three leaves of stickers and two funny photoframes are included. The jokers journal section contains 365 jokes - one for each day of the year and a space to fill with diary dates.

The four hundred marks reproduced in this book represent the diverse array of identity work produced by Pentagram's partners, past and

present, since the company was founded in 1972. Over the past four decades, Pentagram has designed marks for large corporations and small businesses, government agencies and non-profit institutions, clubs and societies, and even individuals, all of whom were seeking a representative symbol to appear on letterhead and books, buildings and websites, and everywhere else imaginable. Previously only distributed in a limited edition, this invaluable book is now made available in a paperback version and will provide inspiration for all graphic designers working on identity projects.

KNX is the # 1 global standard for home and building automation with decades of experience, thousands of products from hundreds of different manufacturers, with a presence on five continents and thousands of professionals certified as KNX partners. Now the immediate question is: What does it take for a KNX partner to be successful? This question has been on the minds of every person interested in home and building automation for years. When going out into the real world, professionals realize that the controlled environment of laboratories or educational institutions is far from reality. They realize that most of the information they studied in expensive courses and long books is of little practical use to them . This is why the vast majority give up on the road or stagnate being a shadow of what could become. There are different formal courses that must be taken to become certified in home automation and professional automation. However, what it really takes to be successful in home and building automation with KNX is not found in traditional training, and usually it is not as complicated as you think it is. This book provides in a pleasant and clear way the necessary tools to be successful in KNX . In addition to the theoretical concepts, it has condensed all the practical information that escapes in most formal courses. It also brings together the mistakes of many people so that you don't make them and the knowledge developed by others over the years so that you can incorporate it thus taking a shortcut to excellence . Here you will also learn to create technology, not only to be a consumer of it like the vast majority of people,

so if you ever want to be a manufacturer of products this is the best way you can take to start opening your mind . Finally this book gives you a projection of the sector of home and building automation that will allow you to be at the forefront for a few more years. This book gives you all the complementary technical material, you can request it to me on my instagram @startupiando.

They were predicting storms for the end of the day but the sky stayed blue and the wind died down. I went to take a look in the kitchen - make sure things weren't getting clogged up in the bottom of the pot. Everything was just fine. I went out onto the porch armed with a cold beer and stayed there for a while, my face in the sun. It felt good. It had been a week now that I'd been spending my mornings in the sun, squinting like some happy idiot - a week now since I'd met Betty.' BETTY BLUE remains a cult book and film nearly twenty years since its first outing. The extraordinary story of an erotic, doomed love affair has transfixed hundreds of thousands of readers around the world.

A definitive collection of interviews with one of America's most famous writers, covering his life, faith, friends, politics, and visions

of the future. Ray Bradbury, the poetic and visionary author of such classics as Fahrenheit 451, The Martian Chronicles and The Illustrated Man, is one of the most influential writers of the 20th century. From Mikhail Gorbachev to Alfred Hitchcock to David Bowie, Bradbury's sway on contemporary culture is towering. Acclaimed biographer and Bradbury scholar Sam Weller has spent more than a decade interviewing the author; the fascinating conversations that emerge cast a high-definition portrait of a creative genius and a futurist who longs for yesterday. Listen to the Echoes: The Ray Bradbury Interviews is the definitive collection of interviews with an American icon.

First published in 1928, this book discusses 'the groundwork and skeleton of the common intellectual life of the people' of Japan.
