Designed as a contribution to contrastive linguistics, the present volume brings up-to-date the comparison of German with its closest neighbour, Dutch, and other Germanic relatives like English, Afrikaans, and the Scandinavian languages. It takes its inspiration from the idea of a "Germanic Sandwich", i.e. the hypothesis that sets of genetically related languages diverge in

systematic ways in diverse domains of the linguistic system. Its contributions set out to test this approach against new phenomena or data from synchronic, diachronic and, for the first time in a Sandwich-related volume, psycholinguistic perspectives. With topics ranging from nickname formation to the IPP (aka 'Ersatzinfinitiv'), from the grammaticalisation of the definite article to /s/-retraction, and from the role of verb-second order in the acquisition of L2 English to the psycholinguistics of gender, the volume appeals to students and specialists in modern and historical linguistics, psycholinguistics, translation studies, language pedagogy and cognitive science, providing a wealth of fresh insights into the relationships of German with its closest relatives while highlighting the potential inherent in the integration of different methodological traditions.

across the world. Donald Trump was elected President of the United States while promising to build a wall on the Mexico border, and in Europe, the international movements of migrants and refugees have sparked fierce discussion about whether and how countries should restrict access to their territory by erecting physical barriers. Virtual walls are also built and crushed at increasing speed. In the post-9/11 era there is a greater danger from so-called "transnational non-state actors", and computer hacking and cyberterrorism threaten to overwhelm our technological barriers. In this timely and original book, Said Saddiki scrutinises the physical and virtual walls located in four continents, including Israel, India, the southern EU border, Morocco, and the proposed border wall between Mexico and the US. Saddiki's detailed analysis explores the tensions between the rise of globalisation, which some have argued will lead to a "borderless world" and "the end of the nation-state", and the rapid development in recent decades of border control systems. Saddiki examines both regular and irregular cross-border activities, including the flow of people, goods, ideas, drugs, weapons, capital, and information, and explores the disparities that are reflected by barriers to such activities. He considers the consequences of the construction of physical and virtual walls, including their impact on international relations and the rise of the multi-billion dollar security market. *World of Walls: The Structure, Roles and Effectiveness of Separation Barriers* is important reading for all those interested in the topics of immigration, border security, international relations, and policy.

An in-depth look at the decades-long effort to escalate hostilities with Russia and what it portends for the future. Since 1945, the US has justified numerous wars, interventions, and military build-ups based on the pretext of the Russian Red Menace, even after the Soviet

Union collapsed at the end of 1991 and Russia stopped being Red. In fact, the two biggest post-war American conflicts, the Korean and Vietnam wars, were not, as has been frequently claimed, about stopping Soviet aggression or even influence, but about maintaining old colonial relationships. Similarly, many lesser interventions and conflicts, such as those in Latin America, were also based upon an alleged Soviet threat, which was greatly overblown or nonexistent. And now the specter of a Russian Menace has been raised again in the wake of Donald Trump's election. The Plot to Scapegoat Russia examines the recent proliferation of stories, usually sourced from American state actors, blaming and manipulating the threat of Russia, and the long history of which this episode is but the latest chapter. It will show readers two key things: (1) the ways in which the United States has needlessly provoked Russia, especially after the collapse of the USSR, thereby squandering hopes for peace and cooperation; and (2) how Americans have lost out from this missed opportunity, and from decades of conflicts based upon false premises. These revelations, amongst other, make The Plot to Scapegoat Russia one of the timeliest reads of 2017.

Recent years have witnessed continued and growing interest in the massive and fascinating poems we know as the Sanskrit epics. This interest has manifested itself in the continuing translations of texts, a steady stream of publications and numerous scholarly meeting of Sanskrit epic scholars. A number of these scholars assembled in Helsinki to constitute the Epic Section of the 12th World Sanskrit Conference in the summer of 2003. The present volume places before the indological community the sixteen learned papers presented at the conference by the distinguished group of scholars who were in attendance. The topics and methodologies of the authors are as varied and diverse as the contents of the monumental poems themselves but each contribution sheds new light on some aspect of the genetic and /or receptive history of these works, their relationship to each other and to other index texts, or the representation and analysis of specific characters and episodes in the poems

Since its publication, C.F. Gauss's *Disquisitiones Arithmeticae* (1801) has acquired an almost mythical reputation, standing as an ideal of exposition in notation, problems and methods; as a model of organisation and theory building; and as a source of mathematical inspiration. Eighteen authors - mathematicians, historians, philosophers - have collaborated in this volume to assess the impact of the *Disquisitiones*, in the two centuries since its publication.

What is innovation and how should it be measured? Understanding the scale of innovation activities, the characteristics of innovative firms and the internal and systemic factors that can influence innovation is a prerequisite for the pursuit and analysis of policies aimed at fostering innovation. First published in 1992, the Oslo Manual is the international reference guide for collecting and using data on innovation. In this fourth edition, the manual has been updated to take into account a broader range of innovation-related phenomena as well as the experience gained from recent rounds of innovation surveys in OECD countries and partner economies and organisations.

This book deals with a subject that has recently been the focus of debate and law reform in many jurisdictions: how much scope should spouses have to conclude agreements concerning their financial affairs - and under what circumstances should such agreements be binding and enforceable? These marital agreements include pre-nuptial, post-nuptial and separation agreements. The book is the result of a British Academy-funded research project which investigated and compared the relevant law of England and Wales, Australia, Austria, Belgium, France, Germany, Ireland, the Netherlands, New Zealand, Scotland, Singapore, Spain, Sweden and the jurisdictions of the United States. In addition to chapters

on these jurisdictions, the book includes a chapter on the 'English practitioner's view'. It also provides a comparative analysis of the different matrimonial property regimes and the rules on marital agreements that explores underlying themes and principles and makes recommendations for regulating marital agreements. A key theme is the function and effect of marital agreements in the different jurisdictions. Thus, each chapter first explains the underlying 'default' rules for ancillary relief/matrimonial property and maintenance. It then analyses the current rules for marital agreements, and gives a brief account of the private international law rules. The book provides a comprehensive source of reference on ancillary relief/matrimonial property and maintenance and the rules on pre-nuptial, post-nuptial and separation agreements in 14 jurisdictions. It offers guidance for academics and practitioners dealing with international matters, and a basis for discussions on law reform. 'I applaud the vision and perseverance of Jens Scherpe in having conceived this book and, with so much distinguished help, in now bringing it to birth. I will be using it for many years and I warmly invite my fellow family lawyers across the world to do likewise.' Foreword by The Rt Hon Lord Wilson of Culworth, Justice of the Supreme Court of the United Kingdom

Soon to be a Showtime documentary, *Murder in the Bayou* is a New York Times bestselling chronicle of a high-stakes investigation into the murders of eight women in a troubled Southern parish that is "part murder case, part corruption exposé, and part Louisiana noir" (New York magazine). Between 2005 and 2009, the bodies of eight women were discovered in Jennings, Louisiana, a bayou town of 10,000 in the Jefferson Davis parish. The women came to be

known as the Jeff Davis 8, and local law enforcement officials were quick to pursue a serial killer theory, stirring a wave of panic across Jennings' class-divided neighborhoods. The Jeff Davis 8 had been among society's most vulnerable—impoverished, abused, and mired with mental illness. They engaged in sex work as a means of survival. And their underworld activity frequently occurred at a decrepit motel called the Boudreaux Inn. As the cases went unsolved, the community began to look inward. Rumors of police corruption and evidence tampering, of collusion between street and shield, cast the serial killer theory into doubt. But what was really going on in the humid rooms of the Boudreaux Inn? Why were crimes going unsolved and police officers being indicted? What had the eight women known? And could anything be done to stop the bloodshed? Mixing muckraking research and immersive journalism over the course of a five-year investigation, Ethan Brown reviewed thousands of pages of previously unseen homicide files to posit what happened during each woman's final hours delivering a true crime tale that is "mesmerizing" (Rolling Stone) and "explosive" (Huffington Post). "Brown is a man on a mission...he gives the victims more respectful attention than they probably got in real life" (The New York Times). "A must-read for true-crime fans" (Publishers Weekly, starred review), with a new afterword, *Murder in the Bayou* is the story of an American town buckling under the dark forces of poverty, race, and class division—and a lightning rod for justice for the daughters it lost.

For many centuries Jews and Germans were economically and culturally of significant importance in East-Central and Eastern Europe. Since both groups had a very similar background of origin (Central Europe) and spoke languages which are related to each other (German/Yiddish), the question arises to what extent Jews and Germans in Eastern Europe

share common historical developments and experiences. This volume aims to explore not only entanglements and interdependences of Jews and Germans in Eastern Europe from the late middle ages to the 20th century, but also comparative aspects of these two communities. Moreover, the perception of Jews as Germans in this region is also discussed in detail.

This book offers explanations of grammatical terms and functions as they apply to English and German. It illustrates the similarities and differences between the two languages and stresses the common linguistics pitfalls for English speakers. It includes review exercises with answers at the back.

The CEFR Companion volume broadens the scope of language education. It owes much to the contributions of members of the language teaching profession across Europe and beyond. This volume contains:

- ? an explanation of the key aspects of the CEFR for teaching and learning;
- ? a complete set of updated CEFR descriptors that replaces the 2001 set with: - modality-inclusive and gender-neutral descriptors; - added detail on listening and reading; - a new Pre–A1 level, plus enriched description at A1 and C levels; - a replacement scale for phonological competence; - new scales for mediation, online interaction and plurilingual/pluricultural competence; - new scales for sign

language competence; ? a short report on the four-year development, validation and consultation processes. The CEFR Companion volume represents another step in a process of engagement with language education that has been pursued by the Council of Europe since 1971 and which seeks to: ? promote and support the learning and teaching of modern languages; ? enhance intercultural dialogue, and thus mutual understanding, social cohesion and democracy; ? protect linguistic and cultural diversity in Europe; and ? promote the right to quality education for all.

Any reader of scholarship on the ancient and early medieval world will be familiar with the term 'Germanic', which is frequently used as a linguistic category, ethnonym, or descriptive identifier for a range of forms of cultural and literary material. But is the term meaningful, useful, or legitimate? The term, frequently applied to peoples, languages, and material culture found in non-Roman north-western and central Europe in classical antiquity, and to these phenomena in the western Roman Empire's successor states, is often treated as a legitimate, all-encompassing name for the culture of these regions. Its usage is sometimes intended to suggest a shared social identity or ethnic affinity among those who produce these phenomena. Yet, despite decades of critical commentary that have highlighted substantial problems, its dominance of scholarship appears not

to have been challenged. This edited volume, which offers contributions ranging from literary and linguistic studies to archaeology, and which span from the first to the sixteenth centuries AD, examines why the term remains so pervasive despite its problems, offering a range of alternative interpretative perspectives on the late and post-Roman worlds.
