Are you someone who loves taking pictures of anything under the sun? Do you feel like making the most out of the things that you have? Well, if that is so, then one of the best things that you can do is get yourself a good camera. The problem though would be the fact that there are so many cameras out there, that it is hard to choose the one that you like. Therefore, it would be better if you can just browse on the trusted designs or units when it comes to getting one for yourself. In line with this, it would definitely be great if you can make sure that things would be for the better as well as it helps you out a lot because knowing more about the camera is going to help you decide if it is something that is worth buying or not. To give you an idea about it, the features of the camera would be a good thing to start on. The Canon Powershot SX60 HS is one of the most popular cameras out there and it has certainly proven itself to be one of the best. To help you out in deciding if you should try it out, here are some of its best features.

This book constitutes the refereed proceedings of the 13th International Conference on Asia-Pacific Digital Libraries, ICADL 2011, held in Beijing, China, in October 2011. The 33 revised full papers, 8 short papers and 9 poster papers presented were carefully reviewed and selected from 136 submissions. The topics covered are digital archives and preservation; information mining and extraction; metadata, catalogue; distributed repositories and cloud computing; social network and personalized service; mobile services and electronic publishing; multimedia digital libraries; information retrieval; and tools and systems for digital library.

With amazing low-light capabilities, incredible definition, intelligent autofocus and a host of other features, digital cameras have now become so powerful that they have left their users behind. Most photographers can take competent shots in a range of conditions, or fix imperfect exposures in Photoshop or Lightroom, but very few have the skill to push their cameras to the limit and capture the perfect shot, under all conditions, with no post-processing required. In Camera is the perfect way to take your photography to that level; to master your camera, understand light, exposure and composition, and make amazing photographs, whatever your camera, without cheating after the event. One hundred of Gordon's beautiful photos are given with his own expert commentary; full settings and camera details are included, and a host of tips and tricks let photographers of any level learn something from every example. The shots are taken with a wide range of cameras, and the emphasis is on getting results by improving your own skills, not wasting money on expensive equipment.

The Canon PowerShot G16 compact digital camera is the successor to the successful G15 and the first in the G-series to come equipped with built-in Wi-Fi. This facility makes it ideal for sharing images and video on social networking websites, or via email through the Canon Image Gateway. Images can also be uploaded using the maker's compatible iOS(R) or Android device with the download of a free Canon CameraWindow app. The G16's 28-140mm wide-angle lens has an aperture range of f/1.8-f/2.8, making it ideal for shooting in low-light conditions or for capturing a dramatic shallow depth-of-field with soft backgrounds. The camera features Canon's HS System, which combines a DIGIC 6 image processor and a 12.1-megapixel High-Sensitivity CMOS image sensor. Autofocus (AF) times and reduced shooting lag are improved over previous G-series models and continuous shooting speeds of up to 9.3 frames-per-second are possible. The G16 captures 1080p/60p Full HD video and has a built-in stereo microphone and an HDMI output for viewing videos on an HDTV. New shooting modes include Star mode for capturing the night sky: Star Nightscape will capture stars in a landscape image, while Star Trails will capture trails of stars in a still image; Star Time Lapse Movie will shoot continuous still images of stars and combine them into a video that replicates the motion of the stars in the sky. With the handheld HDR Scene mode multiple shots of a particular scene are combined to create a high dynamic range image without the need for a tripod. This mode includes Natural, Art Bold, Art Embossed, Art Standard and Art Vivid options. The dials and controls on this digital compact camera are styled similarly to those on Canon's range of EOS digital SLR cameras. The G16 is also compatible with Canon Speedlite flashes and select accessories.
