Do you ever sit and stare at your scrapbooking supplies and wonder where to begin? Do you believe your friends are more creative than you are? Do all of your scrapbooking layouts look the same? Are you in a scrapbooking rut? In my 16 years of scrapbooking I have learned a few things that will make all the difference to you. So take a deep breath, relax and go to page 1 of Design Strategies for Scrapbookers.

From one of New Zealand's most thoughtful writers, not just a finely crafted novel but a whole country, complete with dark undertones. Kit Wallace has spent his whole life running away. Through luck and lack of purpose he has finally washed up in the Pacific nation of Ventiak. Here, on the top floor of the Royal Albert Hotel, he avoids his past by drinking whisky and writing poetry he fully intends no one should ever read. Yet, despite himself, he has been drawn into the lives of the people around him. When he is invited to join a scam in the phosphate industry, which will defraud the Ventiakans of millions of dollars, he is torn between disbelief, self-serving cynicism and a loyalty that takes him by surprise. His life begins to unravel and his is forced into action. Meanwhile, in the upland forest, the Rage is beginning: a periodic rampage of millions of ants that will sweep over the island, carrying all before it. In this, his fifth novel, Chris Else has created an utterly convincing Polynesian setting with its own brilliantly realised language, culture, flora and fauna. His humour and wisdom are at once merciless and forgiving as he uses language to explore man's - and woman's - deep-seated need to be both an individual and to belong.

Bible Stories for Children By Rev. Jefferson Mitchell, Kellie O'Connor

In the Changing Room Before we kick off I have to say this, these are my memories, and it has to be said, some of them have been befuddled by drink and erased from the mental back-up disc due to needing more space for uploading new stuff. Phrases you will see often are 'I really can't remember' 'if I remember correctly' and 'I may be wrong'...yes I will admit it, I have been wrong before...1969 I think it was...oh and once in 1973 as well. I have checked where possible but half the time I can't be arsed so there. One area where some clever shite will immediately contradict me is numbers we took to away games, this was and still is impossible to estimate, so whilst some will try to claim we took thousands to every away match I have tried to judge by how much of the stands we filled in the days when the majority of the travelers all stood together. Characters, there have been 'legends' both on and off the pitch over the years, some have moved on to 'a better place' ...yes living in Pattaya, others have went off to the 'Big Match' in the sky where Jesus grabs the Number Nine shirt every game because he thinks he's Alan Shearer...only for St. Peter to point out that Jackie Milburn's name is already on the team sheet as Centre Forward. No doubt someone will bemoan the absence of some of the terrace 'heroes' but I have only mentioned those I clearly remember. I was never a member of any 'crews' 'firms' or 'gangs' unless you count our collective 70's name the 'Geordie Boot Boys', I was never a ringleader or organiser I

knew who they were and often found myself in their company but chose to stay incognito. This is not a book of statistics, scorers, results or team line ups, they are well documented elsewhere. These are just my, sometimes possibly inaccurate recollections of being a supporter and a footsoldier in the Black & White Army for over fifty years...and if you don't like it...then write yer own...chances are of got your money anyway ...so who's the numbnutz now?

Comprehensive, lavishly illustrated reference work provides biographical/career data for major designers (Adrian, Jean Louis, Edith Head, more). Updated to 1988, with over 400 new film credits. 177 illustrations. Index of 6,000 films.

The new student edition of the definitive reference on urbanplanning and design Planning and Urban Design Standards, Student Edition is theauthoritative and reliable volume designed to teach students bestpractices and guidelines for urban planning and design. Edited from the main volume to meet the serious student's needs,this Student Edition is packed with more than 1,400 informativeillustrations and includes the latest rules of thumb for designingand evaluating any land-use scheme--from street plantings to newsubdivisions. Students find real help understanding all thepractical information on the physical aspects of planning and urbandesign they are required to know, including:

- * Plans and plan making
- * Environmental planning and management
- * Building types
- * Transportation
- * Utilities
- * Parks and open space, farming, and forestry
- * Places and districts
- * Design considerations
- * Projections and demand analysis
- * Impact assessment
- * Mapping
- * Legal foundations
- * Growth management preservation, conservation, and reuse
- * Economic and real estate development

Planning and Urban Design Standards, Student Edition providesessential specification and detailing information for various typesof plans, environmental factors and hazards, building types,transportation planning, and mapping and GIS. In addition, expertadvice guides readers on practical and graphical skills, such asmapping, plan types, and transportation planning.

This notebook was designed with a panda on the front cover and one on the back cover of a small pocket notebook. On the inside are wide ruled lined pages, there are 40 pages in this book. Curated for Earth Day.

This tutorial text focuses on the optics and detector aspects of infrared system design. It introduces the terminology, processes, and instrument design techniques available. Design examples are based on real problems investigated by the author.

The energy used to operate buildings is one of the most significant sources of greenhouse gas emissions. To lessen the human impact on climate, it is necessary to reduce these building-related emissions. New legislation, as well as market and financial pressures, are driving architects and developers to create low-carbon buildings. While it is possible to achieve many of these reductions through appropriate climate-responsive design, many architects are not trained to do this. Filling an urgent need for a design reference in this emerging field, Carbon-Neutral Architectural Design describes how to reduce building-related greenhouse gas

emissions through appropriate design techniques. This full-color book presents strategies and methods to achieve CO2 reductions, with an emphasis on control of energy flows through the building envelope and passive heating and cooling strategies. Strategies for Designing Buildings with a Smaller Carbon Footprint Examining climate change and its relationship with buildings, the book begins with a look at the sources of emissions and how these are produced as a result of interactions between buildings and the surrounding environment. It then introduces a carbon-neutral architectural design process (CNDP) and a roadmap that can be adjusted for different types of projects. Discussing climate analysis and solar geometry, the book explores how understanding the climate where a building is located helps to identify the design strategies that are best suited to that location—whether warm and humid, warm and dry, temperate, or cold. It looks at psychrometrics and how to achieve thermal comfort with minimum emissions. The book also explains how building fabric can be used to control energy flows by conduction, radiation, and convection—helping to reduce overheating and overcooling—and how to incorporate passive cooling and heating systems through appropriate design. The book includes useful references, equations, and illustrations, as well as a comparison of free carbon counting tools that can be used for residential building design. Drawing on the author's extensive experience in teaching and practice, this is a valuable resource for anyone who wants to reduce the carbon footprint of buildings. Examines the current cultural and political wars within society and advocates for a revitalized Christianity that can see truths in both sides and find new ways of looking at such controversial issues as abortion, homosexuality, and the Iraq War.

The White Seed Brings Life to Worlds Three thousand years ago, the seeds arrived from Earth on hundreds of worlds. The developed worlds formed the Network, connected only by radio and laser. Since the time of the seeds, nothing but information has traveled between the stars. Now a starship, The Child of Ambition, is changing that. Her first mission: to explore the dark worlds, the ones that failed. Kali Hakoian, pilot-astronaut and war hero, thought landing on the super-Earth of Keto would be routine. The emptiest seed world—its global ocean matted with algae and crawling with hurricanes—hides the oldest human ruins. Her crew of scientists: a dreamer, a believer, and a retired assassin. Their hypothesis—self-termination of the seed base. But when an act of sabotage strands her in the path of a superstorm, she's forced to escape with the man she trusts the least. They may never find out what happened to the settlers—unless it happens to them. Can she trust her crew enough to find a way out of the darkness?

A blueprint for missional, multi-ethnic Christian community Efrem Smith, an internationally recognized and innovative African-American leader, offers a workable plan for connecting theology, practical ministry models, and real stories of people in multi-ethnic Christian communities. Using the example of Jesus, Smith develops a theology of multi-ethnic and missional leadership. Embracing urban and ethnic subcultures such as hip-hop, this book provides a rich mix of multi-ethnic church development, reconciliation theology, missional church thinking, and Christian community. Provides a common-sense approach to creating a multi-ethnic Christian community Includes practical ministry models and real stories of people who are members of thriving multi-ethnic congregations Author is acclaimed African-American thought leader who planted and led a multi-ethnic churches of close to 1,000 and now leads a regional division of a denominational committed to ethnic, multi-ethnic, and missional churches This book is written for anyone wrestling with what it means to be a Christian in an increasingly multi-ethnic world polarized by class, politics, and race.

"For decades one of America's most recognizable stars, the real Sammy Davis, Jr. has long

remained hidden behind the persona the performer so vigorously generated--and so fiercely protected. In *Black and White* vividly recounts this untold story, drawing on painstaking research and more than two hundred and fifty interviews to trace Davis, Jr.'s journey from the vaudeville stage to Broadway, Hollywood, and, of course, Las Vegas. Here Wil Haygood brings Davis's life into full relief against the backdrop of an America in the throes of racial change. He made his living entertaining white people but was often denied service in the very venues he played, and in his broad and varied friendships--not to mention his romances--Davis crossed racial lines in ways few others had. Both an incisive biography and a sweeping cultural history, *In Black and White* is an important record of a vanished America--and of one of its greatest entertainers."--Provided by publisher.

Childhood memories become warm and rose colored, "and that's as it should be," so said an old friend of mine who shared more than a few with me. Mine, too, are warm and rose colored; but also vivid. Yes, I really do remember being in a crib. Folks challenge me on that once in a while. But for how much longer, I'm not sure. Once the mental concrete hardens, I'll be left with what I can glean from pictures and second hand accounts. So I wrote this book. And of course, one memory led to another. Eleven years of them, the ones I spent growing up Brooklyn. What follows are the good stories of the people who mattered - still matter - to me. Today more than ever, I look at them with warm, rose colored sight, content that my earliest memories are true and valuable.

EARTH DESIGNS - Black and White Book for a Newborn Baby and the Whole Family Special GIFT FOR A NEWBORN BABY Edition

A practical guide to home decorating introduces a host of realistic, stylish, and comfortable design solutions that include no-nonsense ideas for economical, low-maintenance rugs, flooring, furnishings, tiling, window treatments, and storage solutions that can look great while withstanding the wear and tear of everyday life. Original.

The book proposes a new Cultural Realism and Virtualism design model for cultural and creative products based on Laozi's philosophy and analysis of symbolism, metaphysics, three-layered culture, reverse-triangular cultural space and Zen aesthetics. It studies peoples that speak Austronesian languages and offers a detailed comparison of their homogeneous and heterogeneous cultures of color, clothing, housing, boats, birds, symbols, dance and ancestry, and provides insights into the cultural features of deconstruction and construction of color, style, form, shape and function, to compose cultural and creative products using complex, variable, fuzzy evaluation; and structural variation and color evaluation methods. It then uses case studies to show that the products created with the new model not only fulfilled their purpose, but also successfully entered the markets. This book helps qualify decision-making processes, improve accuracy of design scheme evaluation and enhance efficiency in product development, and as such appeals to those in the cultural and creative industry, researchers, designers and those who are interested in product design.

Don Newman's first volume of Savannah centric poetry reflects the close personal relationship

between poet and subject often found in work dedicated to a particular place. Such intimate subjectivity may seem lofty at times. But this Savannah native has a way of bringing grandiose notions of his hometown down to earth. Here, the author's regional sensibilities-together with his stretch toward the universal-offer the reader a unique perspective and a tour of Savannah unattainable during a typical day of sightseeing. While by no means a comprehensive poetic look at the city, Newman's Little Poetry Book of Savannah will surely augment the traveler's backpack, give visitors a distinctive literary keepsake, and make the perfect gift for those back home who would like an authentic little piece of Savannah. Meditative, descriptive, fun, quirky, and enjoyably honest, Newman bares parts of his soul in this down-to-earth, head-in-the-clouds "poetry for everyone." This book is an assessment of the state of Black media, Black families, Black colleges, and Black churches. This discussion manual is a declaration of what must be done to start a MOVEMENT to save the children. This 90-page monologue is an appeal for Black America to reset our agenda by moving away from consumerism and our participation in the entertainment industrial complex and a call for us to return to education and spirituality.

An innovatively packaged literary anthology published to commemorate the International Polar Year-and remind us what we're in danger of losing. The Arctic and Antarctic ice shelves have been an object of obsession for as long as we've known they existed. Countless explorers, such as Richard Byrd, Ernest Shackleton, and Robert Falcon Scott, have risked their lives to chart their frozen landscapes. Now, for the first time in human history, we are in legitimate danger of seeing polar ice dramatically shrink, break apart, or even disappear. The Ends of the Earth, a collection of the very best writing on the Arctic and Antarctic, will simultaneously commemorate four centuries of exploring and scientific study, and make the call for preservation. Stocked with first-person narratives, cultural histories, nature and science writing, and fiction, this book is a compendium of the greats of their fields: including legendary polar explorers and such writers as Jon Krakauer, Jack London, Diane Ackerman, Barry Lopez, and Ursula K. LeGuin. Edited by two contemporary authorities on exploring and the environment, and published to coincide with the International Polar Year, The Ends of the Earth is a memorable collection of terrific writing-and a lasting contribution to the debate over global warming and the future of the polar regions themselves.

Many of the earliest books, particularly those dating back to the 1900's and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.
