The routine jobs of yesterday are being replaced by technology and/or shipped off-shore. In their place, job categories that require knowledge management, abstract reasoning, and personal services seem to be growing. The modern workplace requires workers to have broad cognitive and affective skills. Often referred to as "21st century skills," these skills include being able to solve complex problems, to think critically about tasks, to effectively communicate with people from a variety of different cultures and using a variety of different techniques, to work in collaboration with others, to adapt to rapidly changing environments and conditions for performing tasks, to effectively manage one's work, and to acquire new skills and information on one's own. National Research Council (NRC) has convened two prior workshops on the topic of 21st century skills. The first, held in 2007, was designed to examine research on the skills required for the 21st century workplace and the extent to which they are meaningfully different from earlier eras and require corresponding changes in educational experiences. The second workshop, held in 2009, was designed to explore demand for these types of skills, consider intersections between science education reform goals and 21st century skills, examine models of high-quality science instruction that may develop the skills, and consider science teacher readiness for 21st century skills. The third workshop was intended to delve more deeply into the topic of assessment. The goal for this workshop was to capitalize on the prior efforts and explore strategies for assessing the five skills identified earlier. The Committee on the Assessment of 21st Century Skills was asked to organize a workshop that reviewed the assessments and related research for each of the five skills identified at the previous workshops, with special attention to recent developments in technology-enabled assessment of critical thinking and problem-solving skills. In designing the workshop, the committee collapsed the five skills into three broad clusters as shown below:

Cognitive skills: nonroutine problem solving, critical thinking, systems thinking
Interpersonal skills: complex communication, social skills, team-work, cultural sensitivity, dealing with diversity
Intrapersonal skills: self-management, time management, self-development, self-regulation, adaptability, executive functioning

Assessing 21st Century Skills provides an integrated summary of the presentations and discussions from both parts of the third workshop.

The Guide has been written primarily for students of AS and A Level English Literature as specified by Edexcel in the post-2015 syllabus (9ET0). It addresses Component 1 (8ET0/01 - Poetry and Drama) of the AS syllabus and Component 3 (9ET0/03 - Poetry) of the A2 syllabus, specifically, the requirement to study a selection of Post-2000 poetry. The Guide covers all the poems in the selection from *Poems of the Decade: An Anthology of the Forward Books of Poetry 2002-2011* (ISBN 978-0571281732). The poems are explored individually, and links and connections between them are drawn as appropriate. The format of each exploration is similar:*

- A summary of the key themes of the poems, with a note on possible connections and links to other poems in the selection
- An explanation of any key features of the poem that require additional contextual knowledge or illustration
- A brief summary of the metric form, rhyme scheme or other structural features
- A "walk-through" (or explication) of the poem, ensuring that what is happening in the poem is understood, how the rhythm and rhyme contribute to meaning, an explanation of the meaning of words which may be unfamiliar, an exploration of imagery and language and a comment on main themes.
