Trick Mirror is an enlightening, unforgettable trip through the river of self-delusion that surges just beneath the surface of our lives. This is a book about the incentives that shape us, and about how hard it is to see ourselves clearly through a culture that revolves around the self. In each

essay, Tolentino writes about a cultural prism: the rise of the nightmare social internet; the advent of scamming as the definitive millennial ethos; the literary heroine's journey from brave to blank to bitter; the punitive dream of optimization, which insists that everything, including our bodies, should become more efficient and beautiful until we die. Gleaming with Tolentino's sense of humor and capacity to elucidate the impossibly complex in an instant, and marked by her desire to treat the reader with profound honesty, *Trick Mirror* is an instant classic of the worst decade yet. The topic of the book is the focus on rights, which has spread like wildfire above all in the western part of the world since the Second World War and the impact this way of thinking has had on how we see our fellow human beings. The author sees rights focused thinking and neighborly love as opposites and does not think that the two are compatible. They are mutually exclusive. In other words a different way of thinking is called for, and this applies to all the things that we human beings feel we are entitled to and claim, starting with The Declaration of Human Rights and continuing to the right to a roof over one's head; throughout the chapters of the book the author argues that we human beings do not have any rights at all, and how we instead have to take a closer look at the parts of rights focused thinking that might be justified. What is the interface of human rights and compassion? The various topics are introduced to the reader by a fairytale or a story, which is meant to make the reader reflect on the problem before meeting the author's point of view the same way Jesus made his followers think about a problem by means of parables. What is a human right? How can we tell whether a proposed human right is really one? How do we establish the content of particular human rights and how

do we prevent such rights from harming human relations? These are questions that the author tries to answer.

Best known for his two-year sojourn at Walden Pond in Massachusetts, Henry David Thoreau is often considered a recluse who emerged from solitude only occasionally to take a stand on the issues of his day. In *Thoreau's Democratic Withdrawal*, Shannon L. Mariotti explores Thoreau's nature writings to offer a new way of understanding the unique politics of the so-called hermit of Walden Pond. Drawing imaginatively from the twentieth-century German social theorist Theodor W. Adorno, she shows how withdrawal from the public sphere can paradoxically be a valuable part of democratic politics. Separated by time, space, and context, Thoreau and Adorno share a common belief that critical inquiry is essential to democracy but threatened by modern society. While walking, huckleberrying, and picking wild apples, Thoreau tries to recover the capacities for independent perception and thought that are blunted by "Main Street," conventional society, and the rapidly industrializing world that surrounded him. Adorno's thoughts on particularity and the microscopic gaze he employs to work against the alienated experience of modernity help us better understand the value of Thoreau's excursions into nature. Reading Thoreau with Adorno, we see how periodic withdrawals from public spaces are not necessarily apolitical or apathetic but can revitalize our capacity for the critical thought that truly defines democracy. In graceful, readable prose, Mariotti reintroduces us to a celebrated American thinker, offers new insights on Adorno, and highlights the striking

common ground they share. Their provocative and challenging ideas, she shows, still hold lessons on how we can be responsible citizens in a society that often discourages original, critical analysis of public issues.

“[A] landmark book . . . Solnit illustrates how the uprisings that begin on the streets can upend the status quo and topple authoritarian regimes” (Vice). A book as powerful and influential as Rebecca Solnit’s *Men Explain Things to Me*, her *Hope in the Dark* was written to counter the despair of activists at a moment when they were focused on their losses and had turned their back to the victories behind them—and the unimaginable changes soon to come. In it, she makes a radical case for hope as a commitment to act in a world whose future remains uncertain and unknowable. Drawing on her decades of activism and a wide reading of environmental, cultural, and political history, Solnit argues that radicals have a long, neglected history of transformative victories, that the positive consequences of our acts are not always immediately seen, directly knowable, or even measurable, and that pessimism and despair rest on an unwarranted confidence about what is going to happen next. Now, with a moving new introduction explaining how the book came about and a new afterword that helps teach us how to hope and act in our unnerving world, she brings a new illumination to the darkness of our times in an unforgettable new edition of this classic book. “One of the best books of the 21st century.” —The Guardian “No writer has better understood the mix of fear and possibility, peril and exuberance that’s marked this new millennium.” —Bill McKibben,

American Book Award Winner: A “moving, intimate” account of serving as a translator for undocumented children facing deportation (*The New York Times Book Review*).

Nonfiction Finalist for the Kirkus Prize Finalist for National Book Critics Circle Award for Criticism Structured around the forty questions volunteer worker Valeria Luiselli translates from a court system form and asks undocumented Latin American children facing deportation, *Tell Me How It Ends* humanizes these young migrants and highlights the contradiction between the idea of America as a fiction for immigrants and the reality of racism and fear—here and back home. “Luiselli’s prose is always lush and astute, but this long essay, which borrows its framework from questions on the cold, bureaucratic work sheets with which she became so familiar (for example, ‘Did anything happen on your trip to the U.S. that scared or hurt you?’), is teeming with urgency...In this slim volume about the spectacular failure of the American Dream, she tells the stories of the unnamed children she’s encountered and their fears and desires, as well as her own family’s immigration story.” —*Vulture* “Worthy of inclusion in a great American (and international) canon of writing about migration.” —*Texas Observer* “A

This book is the first collection on the British author Rose Macaulay (1881-1958). The essays establish connections in her work between modernism and the middlebrow, show Macaulay's attentiveness to reformulating contemporary depictions of gender in her fiction, and explore how her writing transcended and celebrated the characteristics of genre, reflecting Macaulay's responses to modernity. The book's focus moves from the interiorized self and the psyche's relations with the body, to gender identity, to the role of women in society, followed by how women, and Macaulay, use language in their strategies for generic self-expression, and the environment in which Macaulay herself and her characters lived and worked. Macaulay was a particularly modern writer, embracing technology enthusiastically, and the evidence of her treatment of gender and genre reflect Macaulay's responses to modernism, the historical novel, ruins and the relationships of history and structure, ageing, and the narrative of travel. By presenting a wide range of approaches, this book shows how Macaulay's fiction is integral to modern British literature, by its aesthetic concerns, its technical experimentation, her concern for the autonomy of the individual, and for the financial and professional independence of the modern woman. There are manifold connections shown between her writing and contemporary theology, popular culture, the newspaper industry, pacifist

thinking, feminist rage, the literature of sophistication, the condition of 'inclusionary' cosmopolitanism, and a haunted post-war understanding of ruin in life and history. This rich and interdisciplinary combination will set a new agenda for international scholarship on Macaulay's works, and reformulate contemporary ideas about gender and genre in twentieth-century British literature.

The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

As seen in Time, USA TODAY, The Atlantic, The Wall Street Journal, and on CBS This Morning, BBC, PBS, CNN, and NPR, iGen is crucial reading to understand how the children, teens, and young adults born in the mid-1990s and

later are vastly different from their Millennial predecessors, and from any other generation. With generational divides wider than ever, parents, educators, and employers have an urgent need to understand today's rising generation of teens and young adults. Born in the mid-1990s up to the mid-2000s, iGen is the first generation to spend their entire adolescence in the age of the smartphone. With social media and texting replacing other activities, iGen spends less time with their friends in person—perhaps contributing to their unprecedented levels of anxiety, depression, and loneliness. But technology is not the only thing that makes iGen distinct from every generation before them; they are also different in how they spend their time, how they behave, and in their attitudes toward religion, sexuality, and politics. They socialize in completely new ways, reject once sacred social taboos, and want different things from their lives and careers. More than previous generations, they are obsessed with safety, focused on tolerance, and have no patience for inequality. With the first members of iGen just graduating from college, we all need to understand them: friends and family need to look out for them; businesses must figure out how to recruit them and sell to them; colleges and universities must know how to educate and guide them. And members of iGen also need to understand themselves as they communicate with their elders and explain their views to their older peers. Because where iGen

family in working-class Nottingham, bestselling British novelist Alan Sillitoe's childhood was marked by his father's unpredictable and violent rage, as well as a near-certain condemnation to a life of labor on an assembly line. His family relocated frequently to avoid rent collectors, trading in one bug-infested hovel for another. Though intelligent and curious, the young author-to-be failed his grammar school entrance exams, and it seemed he was destined for work in a factory. The onset of Sillitoe's teenage years, however, coincided with the advance of Hitler into Russia, and the war offered a chance for the boy to seek out a different fate. At the age of fourteen, Sillitoe used a fake ID to enroll in the Air Training Corps and went on to join the Ministry of Aircraft Production as an air traffic control assistant. He dreamed of becoming a pilot, but the war ended just after he qualified for training and he was instead shipped off to the Malayan jungle during the Communist insurgency as a radio operator for the Royal Air Force (RAF). After two years of living from one wireless watch to the next—taking in bearings and atmospheric readings through the radio, and exploring dangerous and primal landscapes by foot—Sillitoe finally returned to a prospectless postwar England and was diagnosed with tuberculosis. But this curse soon became a blessing: In the RAF hospital, Sillitoe began to read—everything from Kant to Descartes to Bernard Shaw—and he decided to become a writer. Already a

veteran on an RAF disability pension at the age of twenty-one, Sillitoe began writing full-time, neither his physical challenges nor his numerous rejections from publishers deterring him in the least. He joined the Nottingham Writers' Club, and his short stories began to achieve some minor local success. Soon after, a chance meeting with the American poet Ruth Fainlight led to full-blown love, and the two set off for France eager to live in a bucolic setting where they could dedicate all of their time to writing. Circumstance and favorable exchange rates then led the couple to Spain where Sillitoe continued his literary pursuits, met many artists and writers, had run-ins with gypsies, and even underwent police interrogations. Four unpublished novels later—and after nearly a decade of honing his craft—Sillitoe finally found staggering success in his working-class novel *Saturday Night and Sunday Morning* and his collection of short stories *The Loneliness of the Long-Distance Runner*. Written with Sillitoe's signature simplicity, this in-depth autobiography not only gives insight into the formative years and mental maturation of one of Britain's most influential writers, but also tells a great story of an underprivileged man who, with perseverance, made the most of his particular fate.

Smith--selected by acclaimed essayist Phillip Lopate. Not only an education but a joy. This is a book for the ages. --Rivka Galchen, author of Atmospheric Disturbances The essay form is an especially democratic one, and many of the essays Phillip Lopate has gathered here address themselves--sometimes critically--to American values. We see the Puritans, the Founding Fathers and Mothers, and the stars of the American Renaissance struggle to establish a national culture. A grand tradition of nature writing runs from Audubon, Thoreau, and John Muir to Rachel Carson and Annie Dillard. Marginalized groups use the essay to assert or to complicate notions of identity. Lopate has cast his net wide, embracing critical, personal, political, philosophical, literary, polemical, autobiographical, and humorous essays. Americans by birth as well as immigrants appear here, famous essayists alongside writers more celebrated for fiction or poetry. The result is a dazzling overview of the riches of the American essay.

She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb’s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta’s family did not learn of her “immortality” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly

shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta’s daughter Deborah.
