Nemo the clownfish is worried that he's not a strong enough swimmer to compete on his school's swim team. But when his friend Dory encourages him to just keep swimming, Nemo realizes that he can do anything he puts his mind to. Based on Disney/Pixar Finding Nemo, this Step 1 Step into Reading leveled reader is perfect for children ages 4 to 6 who are just learning to read on their own.

Padded board book. Features 7 extra-busy scenes. Includes early-learning ideas. For 18 months to 3 years.

In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

Story time is extra special when you share it with a cuddly plush friend! Based on the beloved Rudolph animated Christmas special, this special set includes a 3-button Play-a-Sound storybook and huggable Rudolph plush. Cuddle up with your reading buddy Rudolph, sing along to "Rudolph the Red-Nosed Reindeer," and get in the Christmas spirit with Santa and his reindeer friends!

This classic novel about adventure, courage and determination takes the reader on an exciting sea voyage around the world. Engaging and entertaining, "In Search of the Castaways" from 1868 is a story about shipwreck, quest and a rescue mission. Mary

and Robert, the children of the castaway Captain Grant, want to launch an expedition with the hope of finding their father. Despite the difficulty to fund the mission, they embark on a long, dangerous and somewhat hopeless journey which can either lead them to their father or endanger their lives. Jules Verne (1828-1905) was a French novelist who mostly wrote adventure fiction inspired by the scientific advances of the 19th century. With the help of editor Pierre-Jules Hetzel he wrote a series of books called "Extraordinary Travels", which includes "Journey to the Center of the Earth" (1864), "Twenty Thousand Leagues Under the Sea" (1870), and "Around the World in Eighty Days" (1873). Widely popular with both children and adults, Verne is one of the most translated authors of all times, and still inspires people the world over.

With First Look and Find: Finding Nemo, What's Different?, your child can join Nemo and his friends in eight great adventures. Suitable for young children, this book features underwater scenes with the popular characters from the Disney/Pixar movie Finding Nemo. Each scene has two colorful side-by-side pictures. Children can look for six or seven "find 'ems" in each picture. Then they can examine the pair of pictures again to find 20 differences between them. Can't find all 20 differences? No problem. An answer key at the back of the book shows each scene with the 20 differences circled.

"Every Pixar movie is connected. I explain how and possibly why." These are the words that began the detailed essay now known as "The Pixar Theory," which came out way back in 2013. It collected over 10 million views on Jon's blog alone, and was syndicated on BuzzFeed, Mashable, Huffpost, Entertainment Weekly, and more - generating over 100 million impressions and now translated into a dozen languages. Now, these thoughts and ideas first written by Jon Negroni have been fully realized inside this book, aptly named The Pixar Theory. In this book, you'll find an analysis of every single Pixar movie to date and how it tells a hidden story lurking behind these classic movies. You'll learn about how the toys of Toy Story secretly owe their existence to the events of The Incredibles. You'll learn about what truly happened to the civilization of cars from Cars before the events of WALL-E. And of course, you'll find out the possible truth for why "Boo" of Monsters Inc. is the most important Pixar character yet. Welcome to the Pixar Theory. Don't forget to fasten your imagination.

Pixar Animation Studios, the Academy Award-winning creators of Toy Story, Toy Story 2, A Bug's Life, and Monsters, Inc., are bringing a new animated movie, Finding Nemo, to the screen this summer. This visually stunning underwater adventure follows eventful and comic journeys of two fish-a father and his son Nemo-who become separated in the Great Barrier Reef. The underwater world for the film was conceptualized and developed by the creative team of artists, illustrators, and designers at Pixar, resulting in a lush landscape rich with detail. The Art of Finding Nemo celebrates their talent, featuring concept and character sketches, storyboards, and lighting studies in a huge spectrum of media, from five-second sketches to intricate color pastels. This behind-the-scenes odyssey invites the reader into the elaborate creative process of animation films through interviews with all the key players at Pixar. There will be children's books related to Finding Nemo, but no adult titles other than this definitive volume. Revealing, insightful, and awesomely creative, The Art of Finding Nemo will delight film-goers, artists, and animation fans alike. Meet Dory's friends in this tabbed board book.

Readers follow the adventures of Nemo, who is captured by divers and winds up in a dentist's aquarium, and his father Marlin and his friend Dory, who attempt to find him, through a series of picture puzzles.

The toys are back in a brand-new adventure! Search for Woody, Buzz, Bo Peep, and more friends, old and new, in 8 exciting scenes inspired by Toy Story 4. Then, turn to the back of the book for even more look and find challenges! How science consultants make movie science plausible, in films ranging from 2001: A Space Odyssey to Finding Nemo. Stanley Kubrick's 2001: A Space Odyssey, released in 1968, is perhaps the most scientifically accurate film ever produced. The film presented such a plausible, realistic vision of space flight that many moon hoax proponents believe that Kubrick staged the 1969 moon landing using the same studios and techniques. Kubrick's scientific verisimilitude in 2001 came courtesy of his science consultants--including two former NASA scientists--and the more than sixty-five companies, research organizations, and government agencies that offered technical advice. Although most filmmakers don't consult experts as extensively as Kubrick did, films ranging from A Beautiful Mind and Contact to Finding Nemo and The Hulk have achieved some degree of scientific credibility because of science consultants. In Lab Coats in Hollywood, David Kirby examines the interaction of science and cinema: how science consultants make movie science plausible, how filmmakers negotiate scientific accuracy within production constraints, and how movies affect popular perceptions of science. Drawing on interviews and archival material, Kirby examines such science consulting tasks as fact checking and shaping visual iconography. Kirby finds that cinema can influence science as well: Depictions of science in popular films can promote research agendas, stimulate technological development, and even stir citizens into political action.
