Governments increasingly offer or demand apologies for past human rights abuses, and it is widely believed that such expressions of contrition are necessary to promote reconciliation between former adversaries. The post-World War II experiences of Japan and Germany suggest that international apologies have powerful healing effects when they are offered, and poisonous effects when withheld. West Germany made extensive efforts to atone for wartime crimes-formal apologies, monuments to victims of the Nazis, and candid history textbooks; Bonn successfully reconciled with its wartime enemies. By contrast, Tokyo has made few and unsatisfying apologies and approves school textbooks that whitewash wartime atrocities. Japanese leaders worship at the Yasukuni Shrine, which honors war criminals among Japan's war dead. Relations between Japan and its neighbors remain tense. Examining the cases of South Korean relations with Japan and of French relations with Germany, Jennifer Lind demonstrates that denials of past atrocities fuel distrust and inhibit international reconciliation. In *Sorry States*, she argues that a country's acknowledgment of past misdeeds is essential for promoting trust and reconciliation after war. However, Lind challenges the conventional wisdom by showing that many countries have been able to reconcile without much in the way of apologies or reparations. Contrition can be highly controversial and is likely to cause a domestic backlash that alarms—rather than assuages—outside observers. Apologies and other such polarizing gestures are thus unlikely to soothe relations after conflict, Lind finds, and remembrance that is less accusatory-conducted bilaterally or in multilateral settings-holds the most promise for international reconciliation.

International Economics is one of the important branches of the study of economics science. The present book is a result of long years of teaching experience in International Economics at University level in several countries including India, Malaysia and the United States and is a definite improvement on other books available on the subject. The book is divided into two parts and explains in detail every aspect of the subject. It will be of use to students of M.A. (Economics), M. Com. as well as those studying this subject as M. Com majors in the Universities of Malaysia, Singapore and other far eastern countries, as well as the countries of the South Pacific.

What do we mean by development? How can citizens, governments and the international community foster development? The process by which nations escape poverty and achieve economic and social progress has been the subject of extensive examination for hundreds of years. The notion of development itself has evolved from an original preoccupation with incomes and economic growth to a much broader understanding of development. In his new book, Ian Goldin considers the contributions that education, health, gender, equity and other dimensions of human well-being make to development, and discusses why it is also necessary to take into account the role of institutions and the rule of law as well as sustainability and environmental concerns.

Developed in the classroom by two of the most prominent researchers in the field, Feenstra and Taylor's International Economics is a modern textbook for a modern audience, connecting theory to empirical evidence and expanding beyond the traditional focus on advanced companies to cover emerging markets and developing economies. The past is capricious enough to support every stance - no matter how questionable. In 2002, the Bush administration decided that dealing with Saddam Hussein was like appeasing Hitler or Mussolini, and promptly invaded Iraq. Were they wrong to look to history for guidance? No; their mistake was to exaggerate one of its lessons while suppressing others of equal importance. History is often hijacked through suppression, manipulation, and, sometimes, even outright deception. MacMillan's book is packed full of examples of the abuses of history. In response, she urges us to treat the past with care and respect.

The world economy is experiencing a very strong but uneven recovery, with many emerging market and developing economies facing obstacles to vaccination. The global outlook remains uncertain, with major risks around the path of the pandemic and the possibility of financial stress amid large debt loads. Policy makers face a difficult balancing act as they seek to nurture the recovery while safeguarding price stability and fiscal sustainability. A comprehensive set of policies will be required to promote a strong recovery that mitigates inequality and enhances environmental sustainability, ultimately putting economies on a path of green, resilient, and inclusive development.

Prominent among the necessary policies are efforts to lower trade costs so that trade can once again become a robust engine of growth. This year marks the 30th anniversary of the Global Economic Prospects. The Global Economic Prospects is a World Bank Group Flagship Report that examines global economic developments and prospects, with a special focus on emerging market and developing economies, on a semiannual basis (in January and June). Each edition includes analytical pieces on topical policy challenges faced by these economies.

Is peace an aberration? The bestselling author of *Paris 1919* offers a provocative view of war as an essential component of humanity. NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY THE NEW YORK TIMES BOOK REVIEW AND THE EAST HAMPTON STAR “Margaret MacMillan has produced another seminal work. . . . She is right that we must, more than ever, think about war. And she has shown us how in this brilliant, elegantly written book.”—H.R. McMaster, author of *Dereliction of Duty* and *Battlegrounds: The Fight to Defend the Free World* The instinct to fight may be innate in human nature, but war—organized violence—comes with organized society. War has shaped humanity’s history, its social and political institutions, its values and ideas. Our very language, our public spaces, our private memories, and some of our greatest cultural treasures reflect the glory and the misery of war. War is an uncomfortable and challenging subject not least because it brings out both the vilest and the noblest aspects of humanity. Margaret MacMillan looks at the ways in which war has influenced human society and how, in turn, changes in political organization, technology, or ideologies have affected how and why we fight. *War: How Conflict Shaped Us* explores such much-debated and controversial questions as: When did war first start? Does human nature doom us to fight one another? Why has war been described as the most organized of all human activities? Why are warriors almost always men? Is war ever within our control? Drawing on lessons from wars throughout the past, from classical history to the present day, MacMillan reveals the many faces of war—the way it has determined our past, our future, our views of the world, and our very conception of ourselves.

*Agricultural Policy in the US: Evolution and Economics* traces the foundation of US agricultural policy from its colonial roots to the present, using economic concepts to analyze and interpret political and economic consequences. Ancient Roman food and agricultural reform, English Corn Law and other historic examples of agricultural policies are included to show that agricultural policy has a long history and has been found necessary for governance throughout history. Processes employed to develop US agricultural policies, the structure and function of government that develops and implements agricultural policy, and the specific evolution of policy from the early twentieth century to the Agricultural Act of 2014 are included. Specific policies in past farm bills are detailed in order to track their evolution and economic effects. This textbook includes arguments for and against common tools of US agricultural policy. This debate continues today and can be seen in a gradual change over time from taxes and tariffs to risk management. Information presented does not attempt to influence the readership towards a pro or con position but rather to present information to help the readers to understand the issues related to agricultural policy in the US.

This book focuses on issues that are relevant for the Euro-Mediterranean Partnership. The depth and the extension of the current political crisis in the area have changed the perspectives of conventional Euro-Mediterranean integration policies. The book provides the grounds for new patterns of analysis and addresses policy guidelines which are able to respond to the dramatic challenges that Mediterranean regions are facing. By implementing a multidisciplinary approach, the volume uncovers the structural determinants of migrations in the area: territorial and social imbalances, climate change, unemployment, weak institutions, poor governance, lack of efficient redistributive policies. Each chapter proposes innovative and rich analyses of the socio-economic conditions of all Mediterranean countries. The prevailing evidence suggests that while the North-South imbalances still persist inside the basin, the recent world economic and financial crises have deepened social, intergenerational and gender inequalities. These inequalities cross all territories both nationally and internationally and affect the living conditions of large segments of population in Southern and Eastern Mediterranean countries. To bridge these gaps it is necessary to strengthen territorial cohesion, reduce income differentials, and improve the access of marginal areas to basic infrastructure. These long term goals can be achieved through an inclusive development model for which young people and women can enjoy the same opportunities of education and work. Offering innovative and practical guidelines for future programs and policies, this book is essential reading for policy makers, researchers at policy think tanks as well as academics and post graduate students of Mediterranean studies and Economic Policy. The general policy recipes, provided to govern migration flows, make useful reading for national and international research centres and major governmental agencies interested in migration issues.

Part of the CBC Massey Lectures Series In History's People internationally acclaimed historian Margaret MacMillan gives her own personal selection of figures of the past, women and men, some famous and some little-known, who stand out for her. Some have changed the course of history and even directed the currents of their times. Others are memorable for being risk-takers, adventurers, or observers. She looks at the concept of leadership through Bismarck and the unification of Germany; William Lyon MacKenzie King and the preservation of the Canadian Federation; Franklin Delano Roosevelt and the bringing of a unified United States into the Second World War. She also notes how leaders can make huge and often destructive mistakes, as in the cases of Hitler, Stalin, and Thatcher. Richard Nixon and Samuel de Champlain are examples of daring risk-takers who stubbornly went their own ways, often in defiance of their own societies. Then there are the dreamers, explorers, and adventurers, individuals like Fanny Parkes and Elizabeth Simcoe who manage to defy or ignore the constraints of their own societies. Finally, there are the observers, such as Babur, the first Mughal emperor of India, and Victor Klemperer, a Holocaust survivor, who kept the notes and diaries that bring the past to life. History's People is about the important and complex relationship between biography and history, individuals and their times.
