This IBM® Redpaper™ publication describes experiences gained while installing Oracle Database 11gR2 with Grid Infrastructure (GI). It covers the set up and installation process for these environments: Setting up Red Hat Enterprise Linux 5 with DASD Setting up Red Hat Enterprise Linux 5 with FCP/SCSI Setting up SLES11 with DASD Setting up SLES11 with FCP/SCSI disks Examples include the installation of the Grid Infrastructure, installation of a single instance database and installation of a two-node Real Application Cluster (RAC) database. In all cases, we use UDEV rules for DASD and single path SCSI, and multipathing for multi-path SCSI to provide device persistency for ASM storage, not ASMLib. Interested readers would include database consultants, installers, administrators, and system programmers. This is not meant to replace Oracle documentation, but to supplement it with our experiences while installing and using Oracle Database products. We made extensive uses of My Oracle Support notes.

Most of them aspire to become an Oracle Certified Master, but the difficulty level of the exam is off the charts and only a handful of the few that undertake the exam pass it. Comprising full hands-on labs and lasting for 14 hours over two days, the exam is among the most rigorous in the tech world. Indeed, to pass the exam, applicants are encouraged to take a year-long foundation course. What if you want to undertake study on your own? There are hardly any reference materials out there that provide a thorough coverage of the course syllabus and test topics in a practical and concise manner--and in a way that will prepare you to pass the exam with flying colors. Oracle Certified Master Kamran Aghayev A., in his Study Guide for Oracle Certified Master 11g Exam, provides thorough coverage of the topics you must know in depth to become an OCM.
