Transferring back to Yorkshire ten years after unsuccessfully closing a murder case, detective inspector Tom Richmond suspects that the true killer may have been someone else and begins to investigate dark family secrets to find the truth.

“A witty, inventive, and bittersweet” (Beth Hoffman, New York Times bestselling author) love story for anyone who’s ever wanted something—or someone—just out of reach, *Close Enough to Touch* will delight fans of Jojo Moyes’s *One Plus One* and Graeme Simsion’s *The Rosie Project*. Can you miss something you never had? Jubilee Jenkins is no ordinary librarian. With a rare allergy to human touch, any skin-to-skin contact could literally kill her. But after retreating into solitude for nearly ten years, Jubilee’s decided to brave the world again, despite the risks. Armed with a pair of gloves, long sleeves, and her trusty bicycle, she finally ventures out the front door—and into her future. Eric Keegan has troubles of his own. With his daughter from a failed marriage no longer speaking to him, and his brilliant, if psychologically troubled, adopted son attempting telekinesis, Eric’s struggling to figure out how his life got so off course, and how to be the dad—and man—he wants to be. So when an encounter over the check-out desk at the local library entangles his life with that of a beautiful—albeit eccentric—woman, he finds himself wanting nothing more than to be near her. Charming and utterly unique, *Close Enough to Touch* is “a story that overflows with compassion, humor, and the impulsive need to read just one more chapter until you reach the very satisfying end” (Patti Callahan Henry, New York Times bestselling author).

This sophisticated book presents new theoretical and analytical insights into the momentous events in the Arab world that began in 2011 and, more importantly, into life and politics in the aftermath of these events. Focusing on the qualities of the sensory world, Maria Frederika Malmström explores the dramatic differences after the Egyptian revolution and their implications for society—the lack of sound in the floating landscape of Cairo after the ouster of President Mohamed Morsi, the role of material things in the sit-ins of 2013, the military evocation of masculinities (and the destruction of alternative ones), and how people experience pain, rage, disgust, euphoria, and passion in the body. While focused primarily on changes unfolding in Egypt, this study also investigates how materiality and affect provide new possibilities for examining societies in transition. A book of rare honesty and vulnerability, *The Streets Are Talking to Me* is a brilliant, unconventional, and self-conscious ethnography of the space where affect, material life, violence, political crisis, and masculinities meet one another.

A bittersweet, seriously funny novel of a life, a small town, and a key to our troubled times traced through a newspaper columnist’s half-century of taking in, and taking on, the world *The curmudgeon* who wrote the column “Ramblin’s by Walt” in the *Granite Creek Gazette* dismissed his successor as “puking on paper.” But when Haze Evans first appeared in the small-town newspaper, she earned fans by writing a story about her bachelor uncle who brought a Queen of the Rodeo to Thanksgiving dinner. Now, fifty years later, when the beloved columnist suffers a massive stroke and falls into a coma, publisher Susan McGrath fills the void (temporarily, she hopes) with Haze’s past columns, along with the occasional reprinted responses from readers. Most letters were favorable, although Haze did have her trolls; one Joseph Snell in particular

dubbed her “liberal” ideas the “chronicles of a radical hag.” Never censoring herself, Haze chose to mollify her critics with homey recipes—recognizing, in her constantly practical approach to the world and her community, that buttery Almond Crescents will certainly “melt away any misdirected anger.” Framed by news stories of half a century and annotated with the town’s chorus of voices, Haze’s story unfolds, as do those of others touched by the Granite Creek Gazette, including Susan, struggling with her troubled marriage, and her teenage son Sam, who—much to his surprise—enjoys his summer job reading the paper archives and discovers secrets that have been locked in the files for decades, along with sad and surprising truths about Haze’s past. With her customary warmth and wit, Lorna Landvik summons a lifetime at once lost and recovered, a complicated past that speaks with knowing eloquence to a confused present. Her topical but timeless *Chronicles of a Radical Hag* reminds us—sometimes with a subtle touch, sometimes with gobsmacking humor—of the power of words and of silence, as well as the wonder of finding in each other what we never even knew we were missing.

We humans are faced with an interesting problem: That which we think we understand the most—our own behavior—we probably understand the least. On the eve of a new millennium, the planet is beset by a host of problems that are, for the most part, caused by human behavior. Ironically, although it seems that the greatest impact of our behavior is on the planet and its other inhabitants, we may actually be threatening our own future the most. For example, we have caused untold harm to the air we breathe, to the water we drink, and, by extension, to much of the food we eat. More important perhaps, we have created a society in which, among other things, many people are anxious and depressed, young women starve themselves, and alcohol and cigarette use are responsible for hundreds of thousands of cases of illness and death every year. And humans still murder one another at an astounding rate, while at the same time continuing to affirm the value of human life. At a time when it is critical that our children become educated, more and more children are not learning the basic skills they will need to think logically so that they can begin to solve the world’s problems. The question may be not “Can the planet survive?” but, rather, “Can we humans survive and change our own destructive actions?” Although many scholars, philosophers,

Though many books are available on the 22 major Tarot cards, few look in depth at the 56 Minor Arcana, or suit cards. Simple, accessible, and easy to understand, these "overlooked mirrors" of everyday life can help us access our inner knowing and learn more about ourselves. In refreshingly down-to-earth terms and with a joyous, commonsense wisdom, Kliegman demystifies the Tarot by revealing its "small secrets."

Arsic unpacks Ralph Waldo Emerson's repeated assertion that our reality and our minds are in constant flux. Her readings of a broad range of Emerson's writings are guided by a central question: what does it really mean to maintain that everything fluctuates, is relational, and so changes its identity?

The deluxe eBook edition of stand-up comedian and WNYC podcaster Phoebe Robinson's *You Can't Touch My Hair* brings Phoebe's hilarious voice off the page, directly into your eyes and ears. This enhanced edition features exclusive video footage with cameos by some of Phoebe's comedy besties, plus more than an hour of audio where Phoebe talks regrettable crushes from the 90s, advice she wishes someone had given her as a teenager, the influence of RuPaul, and much more. Delivered in her signature style, Phoebe serves laughter and levity alongside more serious topics at rapid-fire speeds, topped—as always—with pop culture references for days. A hilarious and timely essay collection about race, gender, and pop culture from upcoming comedy superstar and 2 Dope Queens podcaster Phoebe Robinson *Being a black woman in America means contending with old prejudices and fresh absurdities every day. Comedian Phoebe Robinson has experienced her fair share over the years: she's been unceremoniously relegated to the role of "the black friend," as if she is somehow the authority on all things racial; she's been questioned about her love of U2 and Billy Joel ("isn't that . . . white people music?"); she's been called "uppity" for having an opinion in the workplace; she's been followed around stores by security guards; and yes, people do ask her whether they can touch her hair all the time. Now, she's ready to take these topics to the page—and she's going to make you laugh as she's doing it. Using her trademark wit alongside pop-culture references galore, Robinson explores everything from why Lisa Bonet is "Queen. Bae. Jesus," to breaking down the terrible nature of casting calls, to giving her less-than-traditional advice to the future female president, and demanding that the NFL clean up its act, all told in the same conversational voice that launched her podcast, 2 Dope Queens, to the top spot on iTunes. As personal as it is political, *You Can't Touch My Hair* examines our cultural climate and skewers our biases with humor and heart, announcing Robinson as a writer on the rise.*

Katharine Tait, daughter of Bertrand and Dora Russell, here vividly portrays the extraordinary and stimulating environment she grew up in. In refreshing contrast to the interpretation of Russell as philosopher and public figure, Tait's is a close personal account of her deep love and admiration for her father and its gradual tempering by the imperfections she came to see in him. Touchingly written and beautifully described, the book shows Russell to be a man of

great warmth, charm and humour, but is also a testament to the traumas created when he applied his views on marriage and education to his own home. My Father Bertrand Russell is essential reading for those seeking to understand the private background to Russell's ideas, the personal effects of his lifestyle prescriptions, and what it was like to live with a man of such genius.

A passionate defence of humanity and a work of radical optimism from the international bestselling author of Postcapitalism How do we preserve what makes us human in an age of uncertainty? Are we now just consumers shaped by market forces? A sequence of DNA? A collection of base instincts? Or will we soon be supplanted by algorithms and A.I. anyway? In Clear Bright Future, Paul Mason calls for a radical, impassioned defence of the human being, our universal rights and freedoms and our power to change the world around us. Ranging from economics to Big Data, from neuroscience to the culture wars, he draws from his on-the-ground reporting from mass protests in Istanbul to riots in Washington, as well as his own childhood in an English mining community, to show how the notion of humanity has become eroded as never before. In this book Paul Mason argues that we are still capable - through language, innovation and co-operation - of shaping our future. He offers a vision of humans as more than puppets, customers or cogs in a machine. This work of radical optimism asks: Do you want to be controlled? Or do you want something better?

Aware that our success is also a result of other people, Flip the Switch will show you how to improve the behaviour and thought patterns of those around you too. Practical exercises to get you thinking differently Learn how to change for the better using a variety of techniques Get the confidence to go after what you want, when you want Become extraordinary by adopting Jez's down to earth and charismatic approach Flip the Switch: Achieve Extraordinary Things with Simple Changes to How You Think will change how you approach success and leave you ready to take on the world.

Metaethics occupies a central place in analytical philosophy, and the last forty years has seen an upsurge of interest in questions about the nature and practice of morality. This collection presents original and ground-breaking research on metaethical issues from some of the very best of a new generation of philosophers working in this field.

Some may say that this book is long overdue; others, including myself, will state that the book appears at just the right time. The latter is likely more true, for it is doubtful that many in the professions would, until now, link issues of learning disabilities with those of neurophysiological dysfunction in the manner in which ultimately must be the case. As a matter of fact, there are those who deny the relationship completely. Lee Wiederholt (1974)¹ in his short, but excellent, review of the historical perspectives of learning disabilities, traces the early interest in this problem to the work of Gall (1802), and to his successors Broca (1861), Jackson (1864), Bastian (1869), and a few others. Each of these men would, at the time of this writing, be considered to have interests in the field of neurology, although at the time of their investigations, neurology per se was but a gleam in the eye of the anatomical beholder. A relative detour then took place. Cerebral palsy, in the decades of the 1940s and 1950s, caught the attention of researchers through the work of Winthrop Morgan Phelps (orthopedist) and George

Deaver (physiatrist) and one or two other medically oriented individuals. This was related to the writings of W. J. Little (1810-1894). It was, however, Kurt Goldstein, Heinz Wemer, both eminent German scientists, and Alfred A.

For the first time, the controversial issue of physical contact in the consulting room is explored by distinguished psychoanalysts and psychotherapists representing a diverse range of psychoanalytic viewpoints. The contributors focus on the unconscious meanings of touch, or absence of touch, or unwelcome touch, or accidental touch in the psychoanalytic clinical situation. There are plenty of clinical vignettes and the discussions are grounded in clinical experience. Out of all medical and therapeutic treatments, psychoanalysis remains one of the very few that uses no physical contact. Sigmund Freud stopped using the 'pressure technique' in the late 1890s, a technique whereby he would press lightly on his patient's head while insisting that they remembered forgotten events. He gave up this procedure in favour of encouraging free association, then listening and interpreting without touching his patient in any way. Psychoanalysis was born and the use of touch, as a technique reminiscent of hypnosis, was explicitly prohibited. The avoidance of physical contact between the analyst and patient was established as a key component of the classical rule of abstinence.

Kozier and Erb's Fundamentals of Nursing prepares students for practice in a range of diverse clinical settings and help them understand what it means to be a competent professional nurse in the twenty-first century. This third Australian edition has once again undergone a rigorous review and writing process. Contemporary changes in the regulation of nursing are reflected in the chapters and the third edition continues to focus on the three core philosophies: Person-centred care, critical thinking and clinical reasoning and cultural safety. Students will develop the knowledge, critical thinking and clinical reasoning skills to deliver care for their patients in ways that signify respect, acceptance, empathy, connectedness, cultural sensitivity and genuine concern.

Buddhism is in many ways a visual tradition, with its well-known practices of visualization, its visual arts, its epistemological writings that discuss the act of seeing, and its literature filled with images and metaphors of light. Some Buddhist traditions are also visionary, advocating practices by which meditators seek visions that arise before their eyes. Naked Seeing investigates such practices in the context of two major esoteric traditions, the Wheel of Time (Kalacakra) and the Great Perfection (Dzogchen). Both of these experimented with sensory deprivation, and developed yogas involving long periods of dwelling in dark rooms or gazing at the open sky. These produced unusual experiences of seeing, which were used to pursue some of the classic Buddhist questions about appearances, emptiness, and the nature of reality. Along the way, these practices gave rise to provocative ideas and suggested that, rather than being apprehended through internal insight, religious truths might also be seen in the exterior world-realized through the gateway of the eyes. Christopher Hatchell presents the intellectual and literary histories of these practices, and also explores the meditative techniques and physiology that underlie their distinctive visionary experiences. The book also offers for the first time complete English translations of three major Tibetan texts on visionary practice: a Kalacakra treatise by Yumo Mikyo Dorjé, The Lamp Illuminating Emptiness, a Nyingma Great Perfection work called The Tantra of the Blazing Lamps, and a Bön Great Perfection work called Advice on the Six Lamps, along with a detailed commentary on this by Drugom Gyalwa Yungdrung.

Photography's prominence in the representation and experience of India in contemporary and historical times has not guaranteed it a position of sustained attention in research and scholarship. For a technology as all pervasive as photography, and a country as colossal as India, this scenario is somewhat of an anomaly. Photography in India explores elements of the past, present and future of photography in the context of India through speculation and reflection on photography as an artistic, documentary and everyday practice. The perspectives of writers, theorists, curators and artists are selectively brought to bear upon known as well as previously unseen photographic archives, together with changes in photographic practice that have been synchronous with contemporary India's rapid urban and rural transformation and the technological shift from chemistry and light to programming and algorithms. Essential reading for anyone interested in Indian photography, this book binds insights into a history of photography with its contemporary development, consolidating wide-ranging thinking on the topic and setting the agenda for future research.

From bestselling author Scarlett St. Clair comes a dark and enthralling reimagining of the Hades and Persephone Greek myth. "Let me worship you," he said. She remembered the words she had whispered to him in the back of the limo after La Rose. "You will worship me, and I won't even have to order you." His request felt sinful and devious, and she reveled in it. She answered, "Yes." Persephone is the Goddess of Spring in title only. Since she was a little girl, flowers have only shriveled at her touch. After moving to New Athens, she hoped to lead an unassuming life disguised as a mortal journalist. All of that changes when she sits down in a forbidden nightclub to play a hand of cards with a hypnotic and mysterious stranger. Hades, God of the Dead, has built a gambling empire in the mortal world and his favorite bets are rumored to be impossible. But nothing has ever intrigued him as much as the goddess offering him a bargain he can't resist. After her encounter with Hades, Persephone finds herself in a contract with the God of the Dead, and his terms are impossible: Persephone must create life in the Underworld or lose her freedom forever. The bet does more than expose Persephone's failure as a goddess, however. As she struggles to sow the seeds of her freedom, love for the God of the Dead grows—a love that is both captivating and forbidden.

Set alongside *The Analects* and *Mencius*, these two texts make up the 'Four Books' of Chinese Confucian tradition. Their depiction of the 'Way of Great Learning' focuses on the moral tenets of Confucian thinking, establishing a universal framework that links individuals with the cosmos. By drawing together key ethical and philosophical, and metaphysical issues, the essays deal with the individual's development of moral character. They have long occupied a central position in the educational and political infrastructure of China, Korea and Japan, and their influence and popularity continues to grow, in the East and in the West.

The first five chapters of Aristotle's *De Generatione et Corruptione* distinguish creation and destruction from mere qualitative change and from growth. But what inspires Philoponus most in his commentary on these chapters is the topic of organic growth. How does it take place without ingested matter getting into the same place as the growing body? And how is personal
